

mitech news

In this edition:

- Paper cutting and winding

Greetings to all

Welcome to the April news edition. This month we present only one service, but it is a panel lamination process which is commonly enquired about.

Conference Systems

But first. With the current hold on travel and visits, Mitech welcomes any means of communication which approaches face-to-face discussions. This may include the currently popular Zoom conferencing medium. Feel free to schedule a conference, or request a date and time

Paper rollers cutters and stackers

Offline paper roll winding and cutting and stacking is a common requirement of the panel lamination process.

Mitech collaborates with **Great Richwell Industry and Trading** for a range of high quality machinery to meet your needs

Rolling re-rolling and cutting can include dry paper, treated paper.
Re-winding to “Rainbow rolls” can lead to high efficiency in paper treatment.

Please send your request with required specifications

More details and videos are available

The May edition will include a discussion on coloured dyes and pigments for wood panels and lamination.

Please feel free to request or suggest topics for our newsletters.
And we welcome questions. If we don't have the answer, Mitech has an extensive network of associates for information!

Engineered wood panels

- Conveyors
- Chippers
- Resin plants
- Chip washers
- Plywood presses
- Mat Spray Systems

Panel Lamination

- Paper impregnation lines
- Short Cycle Presses
- HPL Presses
- Veneer presses
- Press Pads
- Press Caul Plates
- Paper winders
- Paper Cutters
- Protective Foil application

Additives

- Release Agents
- Wetting Agents
- Hardeners
- Dyes and Pigments
