

mitech news

In this edition:

- Trasmec conveyor chain
- Panda Pellets
- 2020 News item summary

Greetings to all

Welcome to the July news edition.
This month we present one service for wood panels and for biomass pellet production

Opportunities:

A downturn in the economy offers opportunities to wood panels producers' customers, with the negative effect on balance sheets !

But the current problems can also offer some opportunities.

We mention two as follows:

The quality and performance of Trasmec in our region and of course globally is well-known. Mitech has enjoyed a 20 year relationship

Trasmec is now offering significant discounts on conveyor chains for TK and TTK series chain conveyors.

Since the corona situation hit us all, the supplier of the chain links is face with large stocks which must be reduce over 2020.

This service can also be applied to chains with scrapers for non-Trasmec design

This notice was also circulated to all recent Trasmec customers by Operations Manager of Trasmec Suzhou, Ignaas Declerck,

宝粒特

PANDA PELLET

Beijing Panda Pellet Machinery Co. Ltd

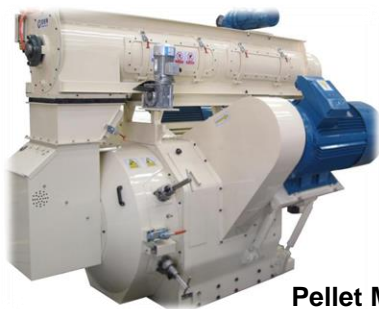

It is clearly a difficult time to consider investment in new machinery. But now may be a time to take advantage of **generous and significant discounts offered by Panda Pellet Machinery**

For several years Mitech has collaborated with Panda Pellet for the supply of complete equipment for the production of Densified Biomass Fuel (DBF) pellet processing machinery and briquette presses. The demand for this clean, renewable and efficient energy source has increased exponentially in recent years since the adoption of the Kyoto Protocol

Panda is a global supplier of design, manufacturing, installing and commissioning of complete pellet and briquette lines. Panda has developed equipment and technology and holds proprietary technology, patents and registered trademarks.

After 30 years of wood panels production machinery experience, wood pellet machinery production was commenced in 2008. Panda established the first Wood Pellet Institute in China together with Nanjing Forestry University, and has undertaken many pellet research projects.

Pellet Mill 860

The market includes:
North America, Oceania, Southeast Asia, Eastern Europe, Africa (except Middle East), Hong Kong/ Macao/ Taiwan, Latin America, Japan & Korea, Mainland China, Western & Southern Europe, Northern Europe, Central & Southern Asia, Middle East

Briquette Press 500

**Pellet Testing Line.
One available**

summary of 2020 topics

- ❖ March
 - Peel coating
 - Pmdi
- ❖ April
 - Paper cutting and winding
- ❖ May
 - Biocides for laminates
- ❖ June
 - Panel colouring Product value
 - New website
- ❖ July
 - Trasmec conveyor chain
 - Panda Pellets

Conference Systems

With the current hold on travel and visits, Mitech welcomes any means of communication which approaches face-to-face discussions.

This may include the currently popular *Zoom* conferencing medium and Microsoft *Teams*. And not forgetting the simple *Skype*!

Feel free to schedule a conference, or request a date and time

Mitech Website

We have upgraded our web-site.

Please visit www.mitechps.com for a full overview of our services All your comments are invited

Engineered wood panels

- Conveyors
- Chippers
- Resin plants
- Chip washers
- Plywood presses
- Mat Spray Systems

Panel Lamination

- Paper impregnation lines
- Short Cycle Presses
- HPL Presses
- Veneer presses
- Press Pads
- Press Caul Plates
- Paper winders
- Paper Cutters
- Protective Foil application

Additives

- Release Agents
- Wetting Agents
- Hardeners
- Dyes and Pigments
