

# mitech news

Greetings to all and welcome to the April 2022 edition of our News Letter

In this edition:

- Automatic packaging
- Chemical prices
- Used machinery update

## Automatic packaging

This month we focus on Automatic packaging production lines

In recent years auto-packing has become more appealing to engineered wood panels producers. Especially since the advent of production rates which, at the start of my wood panels career would have been considered phenomenal!

I am sure the benefits have been considered already by most customers many of whom are already enjoying the benefits

- Attractive packaging
- Uniformity of pack presentation
- For many, lower process cost

Mitech can supply packing lines with attractive pricing

The main functions are:

automatic top protection,  
6-sided circumferential wrapping film.

Adding cardboard protection to the corners

Automatic packaging of long and short sides of the product

### Lamination opportunity 21-001

Shut-down restrictions decline, so this opportunity remains for the lamination of your wood panels. Laminate your wood panels without the risk of investment in property or machinery! Or the need to take on personnel or training!

There are options for a Joint Venture/Partnership with a company with 30 years experience in the sales and marketing of MFC, MDF and related products OEM service, a Joint Venture or partnership will be considered.

Service can include sales & marketing offices set up in Selangor & Singapore And the continuation of an established market

This press is in excellent condition, in full production, operated by an experienced crew, and in a significant regional base of furniture customers, all reliant on laminated panels.

### Finally we emphasise... **Delayed shipments**

We again have to report shipping delays as consequence of the pandemic!

So we take this opportunity to remind everyone that for us and we assume all of your overseas suppliers, **please order in advanced** with contingency allowances for vessel cancellation or departure delays.

1 to 2 week delays are now the rule and not the exception. Customers are advised to order early to avoid production holdups

### Used machinery list
