Special edition - used machinery

In this edition:

- Used machinery service

Greetings to all and welcome to the March 2022 edition of our News Letter

Used machinery

This edition focuses on used machinery

We complement our machinery supply with dismantling pack and re-assembly services, if and when required. Depending on final destination, and engineers' availability, (and socio-political situations)

Mitech can also supply engineering project planning and costing services.

Further, along the project supply chain, advice on operation is available.

And of course we can also sell your machinery

First we emphasise... **Delayed shipments**

We again have to report shipping delays as consequence of the pandemic!

So we take this opportunity to remind everyone that for us and we assume all of your overseas suppliers, **please order in advanced** with contingency allowances for vessel cancellation or departure delays

1 to 2 week delays are now the rule and not the exception.
Customers are advised to order early to avoid production holdups

We start with a **BARGAIN !!** For fast sale
