

mitech news

Hello and welcome to the November 2022 edition of our News Letter

In this edition:

- Post covid status
- New partnerships
- Used machinery

After three stressful years, we all seem to be coping amazingly well with the pandemic..
The ups and downs remain:

- Shipping prices are trending down
- But chemical prices are off the scale!
- Inflation is running rampant
- There is that war in Eastern Europe!

But we are an amazingly resilient industry and we are impressed with stories of management tenacity and innovation.

Mitech has had concerning moments of course but not of the complexity of companies responsible for hundreds, if not thousands of employees, and answerable to shareholders

We too have emerged resilient and looking forward to new challenges.
Of particular success has been the following:

- Wuerztz additives
- Jet-Mate colouring product
- Our Max Plus press cushions
- Our paper impregnation rollers.
- Press caul plates.
- Peel coat machinery
- Process consultancy
- Used machinery

We remain grateful for our partnerships with whom we have stood shoulder to shoulder through tough times.

- Annie and Partner, Indonesia,
- Great Richwell Industry and Trading (Shanghai) Co. Ltd.
- Bunbury Engineering Network, Australia
- Jason Industrial, Co Ltd, Taiwan

We have also formed new and exciting relationships so that we can offer:

- CPL presses for HPL and technical laminates
- Complete production lines at very affordable prices.
Particleboard, MDF, Plywood, Resin production, glue mixing dosing and blending

All include complete installation services, know-how and training

Finally we emphasise... **Delayed shipments**

Used machinery list

21-001	Dieffenbacher Melamine press	6ft x 8ft – Excellent- operating
22-010	Siempelkamp press frames	4x12 short cycle press. 8 available – brand new!
22/015	Dieffenbacher MDF or particleboard	2005 7- 00m3/Day 4.5 mill USD

We repeat that shipping delays are almost normal now!

So we take this opportunity to remind everyone that for us, and we assume all of your overseas suppliers, **please order in advanced** with contingency allowances for vessel cancellation or departure delays.

1 to 2 week delays are now the rule and not the exception.

Customers are advised to order early to avoid production holdups

Thank you for reading and for your interest and to those who take time to comment.

We are all learning, so we invite comment on any topic or suggestions for topics. If we don't know, we do know others who do know
